US Department of Defense, Defense Logistics Agency Improves Project Management

The United States Department of Defense, Defense Logistics Agency requested the assistance of Momentum, Inc. for its Mid-Level Performance Based Logistics Graduation Project, based on Project Management foundations. This project enabled DLA to achieve its core mission, *“Getting the right part, at the right place, at the right time, at the right price,”* and to identify partnering areas to ensure integrated logistics support.

General Services Administration Acquisition and Contract Management Training

The General Services Administration Federal Supply Service Acquisition Management Center utilized Momentum, Inc.’s training expertise to provide an understanding of the value proposition of the Multiple Award Schedule. Following training, participants could relate benefits of the program to the performance of their daily job functions (providing federal customers with product, services and programs to meet their many needs).

Defense Distribution Center Restructures the Commercial Contracting Business Unit

The Defense Distribution Center charged Momentum, Inc. with leading team members through a facilitated balance scorecard restructuring of the Commercial Contracting Business Unit. This new structured framework for analyzing organizational options and implementation strategies resulted in increased productivity, improved business process flow, and higher employee job satisfaction.

NAVSISA STARS Implementation Support

Momentum provides project management support, facilitates requirements gathering initiatives, and assists with business analysis design, methods, and mentoring for NAVSISA (the Navy’s premier Information Technology provider responsible for systems that manage logistics, supply chain management, transportation, finance, and accounting). Momentum’s services helped NAVSISA ensure a less business-disruptive migration to Navy ERP.

NAVSISA Establishes Project Management Methodology

Momentum, Inc. was challenged to review existing NAVSISA’s project management artifacts and processes, conduct needs analysis, recommend enhancements based on industry best practices, and develop a formalized project management methodology. This project validated and enhanced PMM framework and process flows, enhanced the Project Management Process, and executed four project management methodology pilots.
